BARCELONATECH

FUNDACIÓ CIM
BARCELONATECH

Escola Tècnica Superior d'Enginyeria Industrial de Barcelona

Departament de Ingenieria Mecànica

MESIC 2015 BARCELONA

The Manufacturing Engineering Society International Conference is conducted every two years fulfilling one of the most important objectives of the Manufacturing Engineering Society: creating forums for exchanging experiences in this field of knowledge.

The Universitat Politècnica de Catalunya (UPC-BarcelonaTECH), with the support of its technology centre in advanced manufacturing technologies, Fundació CIM, will host and co-organise the 6th International Conference of the Manufacturing Engineering Society at the ETSEIB building in Barcelona.

MESIC's main objective is to offer a meeting point for professionals and researchers from industry, research centres and academia to present and discuss recent advances in the field of Manufacturing Engineering. The scope of the conference will cover several topics for technical papers to be presented in oral and poster sessions. For additional information, please do not hesitate to contact the conference secretariat (info@mesic2015.com).

Also, this edition will coincide on the same dates and in the same location the '18th International Congress 2015 TMT Research / Expert Conference Trends in the Development of Machinery and Associated Technology'. The coexistence of both congresses aims to foster MESIC internationalisation and to enhance synergies between conferences delegates.

Call for scientific committee Application deadline	September 15th 2014
"Call for Abstracts" Submission deadline	November 15th 2014
"Call for papers" Submission deadline	February 28th 2015
